

Quail Hollow Ranch 1956 – north is up, east is right

Changes from 1948 photo:

- Trees and shrubs are just starting to fill in the pastures and orchards, but what is now called the lower chaparral trail still goes through open pasture in this photo
- There's a new pond, created by the Lanes using bulldozers, from the old marshy area to the east of the entrance
- The old concrete rectangular pond just a few feet south of the ranch house is gone
- Only a few trees are left in the old orchard to the East of the corrals
- The Sunset trail near the top of the photo is becoming overgrown
- The Italian trail, below Sunset trail, is still very easy to see. Used for horse and buggy through early 1950s.
